EDUCATION

McGill University – Desautels Faculty of Management, Montreal, Canada 2019 - 2022
Bachelor of Commerce, Major in Finance, Double Concentration in Accounting & Statistics, CGPA: 3.86/4.00

WORK EXPERIENCE

Vental, Boston, MA, United States | *CEO & Founding Engineer* May 2026 – Present

Vallum, Palo Alto, CA, United States (Remote) | *Full Stack Software Engineer Intern* June 2025 – September 2025

- Developed Metrics Dashboard (Full stack) and aided in data cleaning and processing pipeline buildout.
- Front-End: React.js, TypeScript, Tailwind CSS | Back-End: Python (FastAPI), PostgreSQL

Choate Hall & Stewart / Choate Investment Advisors, Boston, United States | *Business Analyst* 2022 - Present

- Manager of a Junior Developer. Maintaining and building out an 'Automations_Portal' codebase/repo that automates away Operational and Investment tasks using Python and LLMs. Current reported time savings of 1,000+ work hours per year.
- CRM Implementation Team Lead; leading data migration effort for CRM implementation.
 - Using Python to clean and format data from 3 different custodians, 2 SQL databases, and Excel files to populate CRM.
- Built several React SPAs to more efficiently gather and validate data (Cash Disbursement, Cash Receipts, Account Closing forms, etc.) that needs to get sent to the Operations team for handling/execution.
 - Information was previously sent via email to an Operations Outlook Inbox with no validation, resulting in errors and delays.
 - Used React.js & HTML to create several dynamic and conditionally validated HTML forms, with export to standard format in Excel.
- Oversee daily operations of Addepar (portfolio management & data aggregation tool) & spearheaded initial data migration
 - Used Python to properly format, sanitize, and upload all data.
- Built Ad-hoc Business Intelligence Dashboards & Reports for Management with HTML, Python, R, SQL, and Quarto.
 - Account Opening Process Metrics Dashboard
 - AUM & New Business Metrics Dashboard
 - Acquisition Onboarding Report (created a temporary report for management to monitor the onboarding of assets of a newly acquired firm)
- Provided general investment research & ad-hoc solutions for the Investment and Operations teams.

McGill University, Montreal, Canada | *Teaching Assistant – Advanced Business Statistics* 2021 - 2022

- Delivered lectures, mentored/tutored students, and graded all assessments – typically reserved for Graduate Students.

PERSONAL PROJECTS

Author and Maintainer of 'addepy' Python library 2025

- Created and maintain 'addepy', an open-source Python SDK for the Addepar API, enabling programmatic access to portfolio analytics, ownership management, and bulk data imports. Designed a two-tier architecture separating CRUD operations from higher-level orchestration workflows, with built-in pagination, rate-limiting, and exponential-backoff polling for async jobs.

Full Stack Development - Dietitian Application - NUTRX 2024 - Present

- Developing a B2B SaaS application for private practice dietitians that aims to help create preliminary meal plans for clients given nutritional and budgetary constraints. The application will also serve as a record for client data, have tele-health functionality and customizable Client Portals for seamless communication with clients.

Front-End: React.js, TypeScript, Tailwind CSS | Back-End: Python (Django, Django Rest Framework, Django-Tenants, Scrapy), PostgreSQL

Coding w/ Bloomberg – Automating Equity Screens & Preliminary DCFs 2022

- Wrote code in R that utilized Bloomberg's Desktop API to scrape and gather data for analysis.
 - Automated Bloomberg's EQS function so that I could run continuous equity screens (i.e. every 'Saturday' since MM/DD/YY).
 - Used scraped information to automate the generation of a preliminary DCF for any company; companies with a significant discrepancy between 'rough draft' implied share price and 7-day VWAP would garner additional refined analysis.

SKILLS AND INTERESTS

Language Skills: Fluent English & French, Basic Spanish

Computer Skills: Python, R, HTML, CSS, JavaScript/TypeScript, Basic SQL, React.js, Web-scraping, Data Visualization, ML, Git

Interests: Data Science, Weightlifting, CrossFit, Calisthenics, Guitar, Golf, Chess, Poker, Math, Rock Climbing, Reading

Influential Role Models: Ray Dalio, Vitalik Buterin, David Friedberg, 3Blue1Brown, Veritasium, Kurzgesagt
